PROFESSIONAL SUMMARY

Mobile developer and AI automation engineer with proven experience shipping production Flutter applications and designing n8n workflows that drive measurable business outcomes. Currently leading AI Automation & Growth at Wasilaah, where I lifted sales by 20% in two months and previously resolved 1,000+ customer cases as Fulfillment Specialist managing Odoo ERP and Shopify operations. Skilled in Flutter, Dart, Clean Architecture, BLoC, Firebase, n8n, Shopify, and Odoo. Comfortable spanning the full stack of a problem — from mobile UI to backend integration to growth experiments — with a strong focus on measurable outcomes.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Clean Architecture, BLoC, Cubit, Provider, Hive, Material Design 3, RTL/Arabic UI, Google Sign-In, Cross-platform iOS & Android

AI Automation & Workflows: n8n, Webhooks, AI Agents, Telegram Bots, HTML Email Templates, Workflow Orchestration

Backend & APIs: REST APIs, JSON-RPC, Firebase (Auth, Firestore, Realtime Database, Cloud Messaging), Odoo ERP, Shopify API

E-commerce & Operations: Shopify, Odoo, Order Fulfillment, Inventory Management, After-Sales Support, Customer Service

Growth & Analytics: Growth Hacking, SMS & Email Campaigns, ROI Tracking, Conversion Optimization, Funnel Analysis

Hardware Integration: TSPL Thermal Printers, Bluetooth, Barcode & QR Scanning

Computer Science Fundamentals: OOP, Data Structures, Algorithms, Problem Solving, Software Design Patterns

Tools: Git, GitHub, VS Code, Figma, Terminal, Postman

Languages: Arabic (Native), English (Professional Working Proficiency)

PROFESSIONAL EXPERIENCE

AI Automation & Growth — Wasilaah

Mar 2026 – Present | Cairo, Egypt

- Designed and shipped **n8n automations** across the storefront, operations, and finance stack at a furniture e-commerce company.
- Engineered an **AI-powered Auto-Reply** system that drafts contextual responses to customer emails, with human approval routed through a Telegram channel before release.
- Built an **ROI tracking system** on top of the customer database to measure campaign returns and inform marketing decisions.

Fulfillment Specialist — Wasilaah

Aug 2025 – Feb 2026 | Cairo, Egypt

- Owned order fulfillment operations across **Odoo ERP** and **Shopify**, including order processing, inventory syncing, payments, and shipping workflows.
- Resolved **1,000+ customer support cases** with measurable improvements in customer satisfaction (CSAT) and average response turnaround.

- Tightened the operational bridge between storefront, warehouse, and finance workflows to reduce errors and speed up dispatch.
- Synced orders, inventory, and customer data between Shopify and Odoo, ensuring data integrity across systems.

Instructor (Part-time) — Ministry of Communications and Information Technology (MCIT) 2024 – Jul 2025 | Egypt

- Part-time instructor in the DECI (Digital Egypt Citizens Initiative) program, mentoring students in mobile and software development.
- Contributed to curriculum design and led hands-on lab sessions on Flutter and modern mobile development practices.

Freelance Mobile Developer — Independent

2023 – 2024 | Egypt

- Designed and shipped Flutter applications for clients across furniture, retail, and services.
- Integrated **Odoo, REST APIs, Firebase**, and thermal-printer hardware (TSPL) into production mobile apps.
- Managed client relationships, scope definition, and delivery timelines end-to-end.

KEY PROJECTS

Barcode Flow | *Flutter, Dart, Odoo, TSPL Thermal Printers, Clean Architecture*

- Responsive mobile and tablet app for printing barcode labels, deeply integrated with Odoo so every printed label matches the live inventory record.
- Built for the Wasilaah packing floor — Arabic-first UI to eliminate product-name mismatches and ensure operator accuracy.
- Real-time printing over TSPL thermal printers, secure login with per-user permissions, and responsive UI for phones and tablets.

Challenge & Risk — Multiplayer Quiz Game | *Flutter, Dart, Firebase, Material Design 3, Google Sign-In*

- Implemented real-time multiplayer functionality with Firebase Firestore and Realtime Database.
- Integrated Firebase Authentication and Google Sign-In; built an admin dashboard for content management.
- Full Arabic language support with right-to-left layout.

Cart Recovery Automation | *n8n, Shopify, Database, Google Sheets*

- End-to-end n8n workflow that detects abandoned Shopify checkouts and runs a multi-step recovery sequence.
- Logs every recovered order to a database so campaign ROI is measurable in real numbers, not estimates.

AI Auto-Reply for Customer Inbox | *n8n, AI Agents, Outlook, Telegram, Google Sheets*

- Routes incoming customer emails through an AI step that drafts a contextual reply.
- Each draft is pushed to a Telegram channel for human approval before being released — combining speed with quality control.

TourScan — Graduation Project | *Flutter, Firebase, QR Scanner, Maps*

- Smart Flutter-based tourism companion app for exploring tourist and historical landmarks through an interactive experience.
- Camera-based landmark scanning, multi-language content, and audio descriptions for a complete visual and auditory experience.

EDUCATION

Bachelor of Information Technology

2021 – 2025

The Egyptian E-Learning University (EELU)

GPA: 3.25 / 4.00

CERTIFICATIONS

- **Microsoft Certified:** Security, Compliance, and Identity Fundamentals
- **CCNA:** Switching, Routing, and Wireless Essentials — Cisco
- Introduction to Mobile Development using Flutter — Information Technology Institute (ITI)
- Flutter & Dart Development — Tharwat Samy
- Mastering Flutter: Responsive & Adaptive UI Design — Tharwat Samy
